

Delve into the core criteria of the Responsible Sourcing Scheme, ensuring transparency and commitment to better practices across the board.

HABITAT AND BIODIVERSITY "Bracken"

What's Covered?

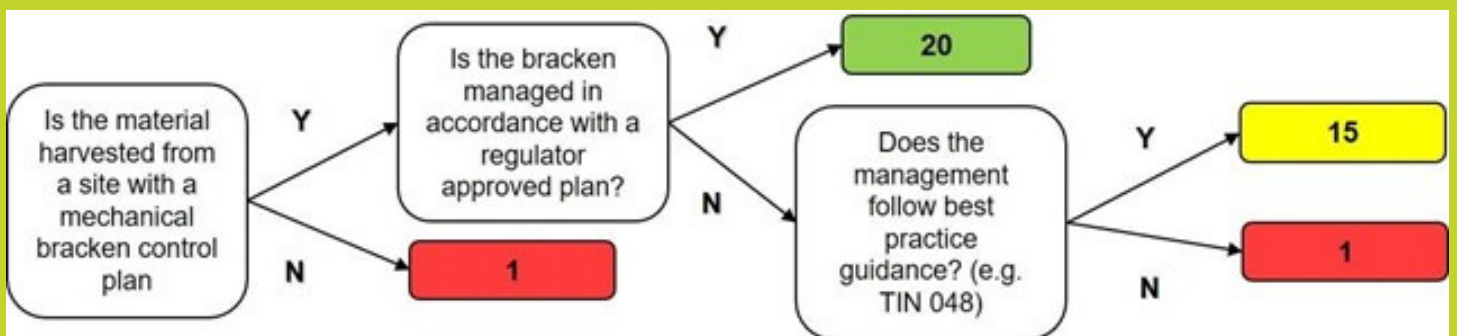

- The scheme includes the extraction and harvest stages of bracken's lifecycle.
- It ensures that bracken management follows best practice guidance and has regulatory approval where necessary.

Evidence Needed:

- A supply chain map showing the sources of bracken.
- Documentation proving that bracken management adheres to an approved plan and best practice guidance, such as Natural England Technical Information Note TIN048.

Ways to Improve:

- Source bracken from locations with a management plan that aligns with best practice guidance.
- Ensure that bracken management plans have received regulatory approval to enhance environmental stewardship.
