Delve into the core criteria of the Responsible Sourcing Scheme, ensuring transparency and commitment to better practices across the board.

Social Compliance
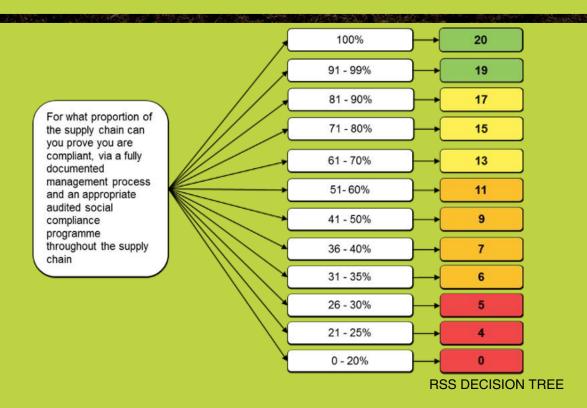

What's Covered?

- A tiered system that distributes compliance responsibilities across the supply chain.

- Primary levels hold greater scoring weight.

Evidence Needed:

- A detailed supply chain map.

- Social Compliance process details which includes internal checks of suppliers, use of management systems (e.g Dedex, BSCI), and self-assessment questionnaires.

- Certification confirming successful independent audits throughout the supply chain.

Ways to Improve:

- Incorporate more of the supply chain into the compliance program and prioritise third-party audits for more accurate results.
- Utilise recognised management systems and auditing approaches and stay aligned to global standards.

For what proportion of the supply chain can you prove you are compliant, via a fully documented management process and an appropriate audited social compliance programme throughout the supply chain

Proportion	Score
100%	20
91 - 99%	19
81 - 90%	17
71 - 80%	15
61 - 70%	13
51 - 60%	11
41 - 50%	9
36 - 40%	7
31 - 35%	6
26 - 30%	5
21 - 25%	4
0 - 20%	0
